

JONES PLUG MOTOR CONTROL WIRING DIAGRAM

The four-terminal Jones Plug as supplied by Am-Source is used in applications, such as for roller shades, where the Radio Receiver and Control Boards cannot be placed into a headrail. The Jones Plug allows the motor cord to be plugged directly into the R-1B Radio Remote Control Box. The power cord from the Control Box plugs into a standard 110 Volt outlet. The Jones Plug is made so that it can only be inserted one way assuring correct wiring and operation.
